PROFESSIONAL SUMMARY

Full Stack .NET Developer with hands-on experience designing and building responsive, production-grade web and mobile applications using React, Angular, ASP.NET Core, C#, and SQL Server. Built a school-management platform serving 2,000+ users and improved database performance by 30%+ through targeted query tuning. Skilled in layered architecture (Controller-Service-Repository), JWT-based authentication, role-based access control, and Agile, Git-driven team collaboration.

TECHNICAL SKILLS

Languages & Frameworks

C#, ASP.NET Core, ASP.NET Core Web API, React.js, Angular, React Native, HTML5, CSS3, JavaScript, Firebase, Typescript, Javascript

Databases

SQL Server, MySQL, PostgreSQL, Stored Procedures, Query Optimization, Database Schema Design

APIs & Architecture

RESTful API Design, Layered Architecture (Controller-Service-Repository), JWT Authentication, Role-Based Access Control (RBAC)

Tools & Practices

Git, GitHub, Visual Studio, Visual Studio Code, Postman, Mantis, Agile/Scrum, Unit Testing, Debugging, Code Review

PROFESSIONAL EXPERIENCE

Logical Hunt Technology LLP, Full Stack .NET Developer

05/2025 – Present | Wakad, Pune, India

- Built and shipped 9+ responsive UI screens and components using React and Angular, applying interpolation, property binding, and event binding to create dynamic, data-driven user experiences.
- Built and integrated 9+ back-end modules and Web API endpoints in C# using ASP.NET Core, powering secure data exchange between front-end applications and business logic layers.
- Tuned SQL Server stored procedures supporting core business operations, improving query execution speed by over 30%.
- Collaborated with a cross-functional team using Git and Mantis for version control and issue tracking, contributing to the on-time completion of 7 client projects.

PROJECTS

SchoolHub360 - School Management & Communication Platform (Mobile Application)

02/2026 – 04/2026

- Built a full-stack school management application supporting 2,000+ users across multiple schools, connecting students, teachers, parents, and administrators through a single platform.
- Rolled out core modules for attendance tracking, timetable management, homework updates, announcements, and student performance monitoring.
- Implemented token-based authentication (JWT) with role-based access control to safeguard user data across roles.
- Structured back-end services using a layered Controller-Service-Repository pattern for maintainable, scalable application logic.
- Integrated real-time notifications and interactive dashboards to streamline daily school operations.
- Engineered a responsive UI for mobile and web platforms and managed secure storage of student records and academic data.

SLNG - Singapore Liquefied Natural Gas Management System

08/2025 – 02/2026

- Built a web-based management system to monitor LNG operations, inventory, and distribution workflows.
- Built and deployed secure Web API endpoints in ASP.NET Core to support plant operations and reporting workflows.
- Designed relational database schemas in SQL Server and tuned queries for efficient operational data processing.

ALCBT - Asia Low Carbon Buildings Transition

07/2025 – 09/2025

- Built responsive UI screens in React using reusable, modular components to accelerate feature development.
- Implemented back-end business logic in C# using controller and service layers, exposed through ASP.NET Core endpoints.
- Modeled MySQL database tables and authored efficient stored procedures and SQL queries to support application data needs.

EDUCATION

Master of Computer Applications (MCA), Trinity Academy of Engineering

08/2024 – 06/2026 | Pune, India

CGPA: 7.71

Bachelor of Computer Science (BCS), PVP Sr. College

07/2021 – 05/2024 | Loni, India
