Profile

Motivated and detail-oriented Junior Full Stack Developer with hands-on experience in building responsive web applications using React, Angular, ASP.NET Core Web API, and SQL Server. Proficient in front-end development, RESTful API's integration, and backend logic using C#. Experienced in writing and optimizing SQL Server stored procedures for business operations.

Education

Master of Computer Applications,

Trinity Academy Of Engineering Pune

08/2024 – 06/2026 | Pune, India

CGPA: 7.05

Bachelor of Computer Science,

PVP Sr College Loni

07/2021 – 05/2024 | Loni, India

CGPA: 7.80

HSC, DVMH Konchi Sangamner

06/2019 – 06/2020 | Sangamner, India

Mark: 75.00 %

SSC, IEMS Chandanapuri Sangamner

06/2018 – 06/2019 | Sangamner, India

Mark: 73.80 %

Tools

Software Tools

GitHub, Mantis, Visual Studio, Visual Studio Code, Postman

Technical Skills

Development

React.js, Angular, HTML, CSS, C#, ASP.NET Core, REST API's, SQL, Stored Procedures, React Native

Database

MySQL, PostgreSQL

Professional Experience

Full Stack Dot Net Developer, Logical Hunt Technology LLP

06/2025 – Present | Wakad, Pune, India

- Front-end | React, Angular : Utilized data-binding techniques, including interpolation, property binding, event binding.
- Back-end [C#, ASP.Net(Web API)] : Designed and implemented RESTful API's using C# enabling secure and efficient communication between front-end and back-end systems.
- Database: Created and optimized complex stored procedures in SQL Server for various business operations

Projects

SchoolHub360 (Mobile Application),

A comprehensive school management and communication platform

02/2026 – 04/2026

- Developed a full-stack school management application to streamline communication between students, teachers, parents, and administrators.
- Executed modules for attendance tracking, timetable management, homework updates, announcements, and student performance monitoring.
- Built secure authentication and authorization using JWT Token-based authentication and role-based access control.
- Created RESTful API's using layered architecture with Controller, Service, and Repository patterns.
- Integrated real-time notifications and dashboard functionalities for efficient school operations.
- Developed responsive and user-friendly UI for mobile/web platforms.
- Worked with database management for storing student records, academic details, and user data securely.

SLNG (Singapore Liquefied Natural Gas)

08/2025 – 02/2026

- Developed a web-based SLNG management system to monitor LNG operations, inventory, and distribution workflows.
- Developed and executed secure REST API's using ASP .NET Core for SLNG plant operations and reporting modules.
- Created SQL Server database schemas, optimized queries, and applied stored procedures for operational data.

ALCBT(Asia Low Carbon Buildings Transition)

01/2025 – 08/2025

- Developed responsive UI screens using React with reusable and modular components.
- Built secure REST API's in ASP .NET Core for core application modules.
- Applied business logic and server-side processing in C# using controllers and service layers.
- Designed MySQL tables and executed optimized stored procedures and SQL queries.

Certificates

- Future Skill Training for Java & Aptitude

LANGAUGES

- English, Marathi, Hindi
